

# TEST DRIVE OPTO 22's PAC Automation and Control System

## On October 8<sup>th</sup> you can be in control

Industrial Controllers, Distributed I/O and HMI Software for Automation

On October 8<sup>th</sup>, Martindale Associates invites you to test drive and learn about the Opto 22's PAC Automation and Control System. We will have a limited number of seats available for participants to work with a live demo of Opto 22 hardware and software. Martindale's certified Opto 22 training staff will take you through a tour of the hardware and software. After the test drive, participants will have an understanding of how they can utilize Opto 22 for their automation needs. Each student will have an opportunity to use an Opto 22 PAC learning kit and computer to learn how to use the system. The test drive will be a ½ day session on Thursday October 8th.

Please contact **Martindale Associates** for further details and to reserve a seat.
